Brand New Book ***** Print on Demand *****.Excerpt from Outlines From Plato, an Introduction to Greek Metaphysics This selection of passages is primarily intended for students of the Oxford school of Literae Humaniores, but the compiler hopes that it may also be found useful by any others who are commencing their study of Plato, on its metaphysical or logical side. Some slight experience of teaching, coupled with his own recollection of early days, has convinced him that merely to give pupils a list of references to parallel passages, bearing on any particular point under discussion, is in most cases quite inadequate. And yet no single dialogue, not even one so comprehensive as the Republic, can be understood without a knowledge of much contained elsewhere; and to know all about one involves knowing something about all. The author, however, admits that his original design was not to illustrate Plato. It was rather to put into Greek dress the more permanent problems of Metaphysics in all ages, and to show that the questions which to-day divide philosophers were most of them raised and debated years ago by the Greeks, with all the additional power and lucidity that their unrivalled language lent them. Such an object proved subsequently to be chimerical; and, having determined to draw his illustrations of these problems from the writings of Plato, the compiler was gradually obliged to limit himself to a rudimentary exegesis of Plato.
