Business analysis is the fastest growing field in business today and the role of the business analyst is both strategic and tactical. At the strategic level, the focus is on understanding the needs of the business as a whole, its strategic direction, and identifying initiatives that will enable the business to meet its goals. At the tactical level, the discipline originally emerged from work previously done by project managers, such as gathering high level business requirements, and work done by systems analysts, such as designing functional requirements for software behavior. This book gives insight into the ideal skills and characteristics of successful business analysts and provides a foundation of learning for effecting business analysis work. This guide will also help prepare you for business analysis certification by explaining the tasks and knowledge areas in the Business Analysis Body of Knowledge (BABOK(TM)). Seven Steps to Mastering Business Analysis will help build the skill sets of new and experienced analysts, and those currently doing analysis work...
