Createspace, United States, 2010. Paperback. Book Condition: New. 250 x 200 mm. Language: English . Brand New Book ***** Print on Demand *****.This colorful math book introduces a novel visual method for students to master their fraction arithmetic skills. The creative design helps to engage student interest, while the visual layout ties into one of the current pedagogical drives in education - namely, to use visual strategies since research has shown them to be effective learning tools. These visual problems also help to develop visual skills. This volume focuses on adding and subtracting fractions. The back of the book features a table of answers to help students check that they are practicing correct techniques (or it may serve as a grading key for teachers or parents). A concise description of radial math - including how to solve the problems - is given in the introduction. The first exercise of the first problem has been fully solved in order to help students get started. There are also two completely answered, full-size examples on the front and back cover. Studying these examples and checking the answers to the first page of each part will help students become confident that they understand what to do. Each section (one for addition and one for subtraction) begins with a concise explanation of how to add or subtract fractions, which includes finding a common denominator and reducing fractions. A couple of examples of how to add and subtract fractions, showing all of the steps, serve to demonstrate how to do the math. The interior is printed in full color with aesthetic visual patterns. The 8 x 10 pages are nearly the same size as standard school papers that students are used to working with. With 16 problems per page, there are 576 exercises all together. Each...
