However, the evidence on the relation between ownership and capital structure is less consistent and numerous, although there are good reasons to believe that there may be such a relationship. Since the capital structure irrelevance propositions of MODIGLIANI/MILLER economists have devoted considerable time to studying cross-sectional and time-series variations in capital structure. More recent work following the seminal contribution by JENSEN/MECKLING has employed an agency theory perspective in the search for an explanation of capital structure variations. With this managerial perspective capital structure is not only explained by variations in internal and external contextual factors of the firm, but also by the values, goals, preferences and desires of managers. Corporate financing decisions are influenced by managers incentives and the incentives for managers to act opportunistically can be influenced by the ownership structure of the firm. However, most empirical work analyzing a firm s capital structure in cross-sectional and time-series studies ignores the equity ownership structure as a possible explanatory variable. This can be partly explained by problems associated with the availability of ownership data, when compared to readily available accounting and market data on other relevant variables. Notwithstanding, it entails a problem of model misspecification as omitting a relevant variable may cause misleading...
