GEOCHEMICAL DATA FOR SAMPLES COLLECTED IN 2008 NEAR THE CONCEALED PEBBLE PORPHYRY CU-AU-MO DEPOSIT, SOUTHWEST ALASKA: OPEN-FILE REPORT 2009-1239

To download **Geochemical Data for Samples Collected in 2008 Near the Concealed Pebble Porphyry Cu-Au-Mo Deposit, Southwest Alaska: Open-File Report 2009-1239** eBook, make sure you click the button listed below and download the ebook or have accessibility to additional information which are relevant to **GEOCHEMICAL DATA FOR SAMPLES COLLECTED IN 2008 NEAR THE CONCEALED PEBBLE PORPHYRY CU-AU-MO DEPOSIT, SOUTHWEST ALASKA: OPEN-FILE REPORT 2009-1239** book.

Bibliogov, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.In the summer of 2007, the U.S. Geological Survey (USGS) began an exploration geochemical research study over the Pebble porphyry copper-gold-molybdenum deposit. This report presents the analytical data collected in 2008. The Pebble deposit is world class in size, and is almost entirely concealed by tundra, glacial deposits, and post-Cretaceous volcanic rocks. The Pebble deposit was chosen for this study because it is concealed by surficial cover rocks, is relatively undisturbed (except for exploration company drill holes), is a large mineral system, and is fairly well-constrained at depth by the drill hole geology and geochemistry. The goals of this study are to 1) determine whether the concealed deposit can be detected with surface samples, 2) better understand the processes of metal migration from the deposit to the surface, and 3) test and develop methods for assessing mineral resources in similar concealed terrains. The analytical data are presented as an integrated Microsoft Access 2003 database and as separate Excel files.
