Not illustrated. 1899 Excerpt: . every internal organ has its corresponding skin area. In the case of spinal cord diseases this form of excitation is most easily effected by farado-cutaneous brushing. The electric douche is highly effective for the same purpose; its technique is described under Hydro-electric methods. The treatment of tender points may be referred to here. An electrode varying in size with that of the painful area is attached to the positive pole and allowed to remain stable on the tender point for five to thirty minutes. The current density for such a purpose ought not to exceed, for short applications, 1 ma. per sq. in., and in longer applications may even be so low as 2. Experimentally demonstrated by Hodge. The treatment of such areas by sinapisms and hydro-therapeutic methods are familiar instances of this; and almost equally familiar is the faradic brushing of the nape of...
